

Brain MCP

RV

Connect Claude Code or Codex to the read-only Ventures brain so the team can ask general questions in chat.

MCP-ONLY PACKAGE. NO BUNDLED WORKFLOW. NO BRAIN WRITE ACCESS.

What This Is

- A read-only MCP connection to the Rockaway Ventures brain.
- It lets Claude Code or Codex search and read brain context during chat.
- It also installs a small memory lookup skill that tells agents to call `memory_lookup` first.

What This Is Not

- Not a meeting-prep packet generator.
- Not an app-specific automation beyond fast lookup guidance.
- Not a way to edit the brain.

Install On Windows

Open PowerShell and paste this command. Setup will ask for your bearer token, hidden while you type.

```
irm https://raw.githubusercontent.com/zabrodsk/rockaway-ventures-brain-mcp/main/setup.ps1 | iex
```

Install On Mac Or Linux

```
bash -c "$(curl -fsSL https://raw.githubusercontent.com/zabrodsk/rockaway-ventures-brain-mcp/main/bootstrap.sh)"
```

1 What Gets Connected

MCP ENDPOINT

```
MCP name: rockaway-ventures
MCP URL: http://100.102.180.108:8789/rockaway-ventures/mcp
Access: read-only
```

You need private-network access to reach this address and a bearer token from the Rockaway brain admin. For speed, agents should call `memory_lookup` first; it uses the sanitized Ventures QMD index before falling back to GBrain.

2 How To Ask Questions

After setup, restart Claude Code or Codex if it was already open. Then ask normal questions. The recommended first MCP tool is **memory_lookup**; it uses Mac mini-side QMD memory first and **get_page** only for the strongest matches.

EXAMPLES

```
Use the Rockaway Ventures brain to summarize what we know about Acme.  
Search the Ventures brain for recent notes about this founder.  
What open threads do we have around this deal?  
Which pages mention this person?
```

CSV PROMPT

```
Use the Rockaway memory lookup skill for this team. For each CSV row, call memory_lookup first, then get_page only for the strongest matches.
```

3 Troubleshooting

Cannot connect

Make sure your machine is on the private network where **100.102.180.108** is reachable.

Unauthorized

Ask for a fresh Ventures bearer token and rerun the setup command.

Rockaway Ventures Brain MCP. Read-only retrieval for Claude Code and Codex.
